

Gaurav Chavda

MERN Stack Developer

Ahmedabad, Gujarat, India | +91 85274 17845 | gauravbhai1911@gmail.com | [linkedin.com/in/chavda-gaurav](https://www.linkedin.com/in/chavda-gaurav) | github.com/gauravchavdavhits

PROFESSIONAL SUMMARY

Full-Stack MERN Developer with hands-on experience across the software development lifecycle, from database design to deployment-ready code. Proficient in building responsive, component-based front-end interfaces with React.js and TypeScript, and engineering secure, scalable RESTful APIs with Node.js and Express.js backed by MongoDB. Skilled in JWT-based authentication, role-based access control (RBAC), schema design, and end-to-end development of multi-module business applications. Experienced in reusable component architecture, form validation, data visualization, and third-party library integration. Strong foundation in Git-based version control, API testing, and writing clean, maintainable, production-style code.

Core Competencies: Full-Stack Web Development | Front-End Development (React.js) | Back-End Development (Node.js, Express.js) | RESTful API Design & Integration | Database Design (MongoDB, Mongoose) | Authentication & Authorization (JWT, RBAC) | Responsive UI/UX Development | Version Control (Git/GitHub) | Debugging & API Testing

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend Development: React.js, React Router, Bootstrap, Material UI (MUI), Formik, Yup, Recharts, Responsive Web Design

Backend Development: Node.js, Express.js, RESTful API Design, JWT Authentication, Role-Based Access Control (RBAC), Middleware Development, Joi Validation, Multer, Nodemailer

Database: MongoDB, Mongoose ODM, Schema Design, NoSQL Data Modeling

Tools & Testing: Git, GitHub, Postman (API Testing), VS Code, npm, bcrypt.js, Helmet, Morgan, dotenv, CORS, jsPDF, XLSX (Excel Export)

Concepts: RESTful Architecture, MVC-Style Application Structure, CRUD Operations, Software Development Life Cycle (SDLC), Debugging

PROFESSIONAL EXPERIENCE

Virtual Height

March 2026 - Present

MERN Stack Developer Intern (6-Month Internship) | Ahmedabad, India

- Engineered a full-stack Solar Installation Management System using React.js, Node.js, Express.js, and MongoDB, applying production-style development workflows, coding standards, and version control practices.
- Architected responsive, reusable UI components in React.js — including forms, tables, modals, and filters — to deliver a consistent, scalable user experience across 40+ application screens.
- Designed and implemented RESTful APIs in Express.js with Mongoose, covering CRUD operations, request validation, and role-based authorization for a multi-module business application.
- Implemented JWT-based authentication and role-based access control (RBAC) middleware to secure application routes and enforce user-role permissions.
- Debugged, tested, and optimized application features using Postman for API testing and browser dev tools, ensuring reliable functionality across modules.
- Collaborated within a structured development environment, applying industry practices such as modular code organization, middleware-based validation, and environment-based configuration.

KEY PROJECTS

Solar Installation Management System (Full-Stack ERP Application)

Technologies: React.js, Node.js, Express.js, MongoDB, Mongoose, JWT, TypeScript, Bootstrap, Material UI (MUI), Formik, Yup, Recharts, jsPDF, XLSX

- Independently architected and developed a full-stack ERP-style web application to manage end-to-end solar installation business operations, covering lead management, site survey, solar design, quotation, project approval, installation, and commissioning & handover.
- Engineered secure authentication and a role-based access control (RBAC) system using JWT and custom Express middleware, enabling differentiated access for admin, technician, and other user roles.
- Built and integrated 40+ RESTful API endpoints across modules including inventory, warehouse, vendor management, technician scheduling, AMC (Annual Maintenance Contracts), maintenance tickets, warranty claims, and subsidy tracking.
- Modeled 45+ MongoDB/Mongoose schemas to structure relational business data across leads, customers, projects, products, and financial records such as invoices, receipts, credit notes, and GST invoicing.
- Engineered a reusable React.js component library (buttons, dropdowns, modals, pagination, filters, toasts) to maintain UI/UX consistency across the entire admin panel.
- Developed analytics dashboards and reporting modules (financial, sales, inventory, technician, and project reports) using Recharts for data visualization, with PDF and Excel export functionality via jsPDF and XLSX.
- Integrated client-side form validation using Formik and Yup, and server-side request validation using Joi, along with secure file upload handling via Multer.
- Implemented automated email notification workflows (password reset, alerts) using Nodemailer, and applied backend security best practices including Helmet, bcrypt.js password hashing, and CORS configuration.

EDUCATION

Bachelor of Computer Applications (BCA)

Graduated: 2024

Shree Adarsh BCA College, Botad, Gujarat

CERTIFICATIONS

- MERN Stack Development Training, Virtual Height (August 2025 – March 2026)
- MERN Stack Developer Internship, Virtual Height (March 2026 – Present)
- Node.js Certification Course – Master the Fundamentals, Scaler Topics (June 2026)
- React JS Course, Scaler Topics (April 2026)
